DOUBLE DEGREE PROGRAMMES AS AN INSTRUMENT FOR MODERNIZATION OF RUSSIAN HIGHER EDUCATION

A.I. Gorylev

Lobachevsky State University of Nizhni Novgorod

The paper analyzes the role of double degree programmes as an instrument of internationalization in the process of modernization of higher education in Russia. There are indicated levels of internationalization of Russian HEIs and opportunities to strengthen their competitiveness in the global market of educational services. It shows the practical

experience of Lobachevsky University on the implementation of several double degree programmes jointly with European universities. There have been formulated proposals to change Russian legislation with a view to stimulating the activity of universities in internationalization. It is concluded that the development and implementation of double degree programmes is an effective way of modernizing Russian higher education, improving its quality and competitiveness. Taking into account the inadequacy of the level of internationalization of most Russian universities, it is considered the need for the state to create an environment in which universities will be interested in carrying out activities to promote the international dimension in education and science.

Keywords: *double degree programmes, internationalization, European Higher Education Area, modernization of higher education, Bologna process, quality of education, innovations in education.*

RESEARCH POTENTIAL AND ITS REALIZATION AMONG CHINESE BACHELOR GRADUATES STUDYING IN CHINESE AND RUSSIAN UNIVERSITIES

Q. Fan, N. Bordovskaia, E. Petanova

Saint-Petersburg State University

The article presents the results of comparison of the levels of the research potential (RP) and its three components (motivational, cognitive and behavioral) among the Chinese bachelor graduates studying in Chinese and Russian universities. The study was conducted on the basis of the Shanxi University (Chinese University) and the Saint-Petersburg State University (Russian University). It is established that Chinese graduates studying in the

Russian university (98 students) have higher indicators of the RP as a whole and higher indicators of cognitive and behavioral components of the RP than Chinese bachelors studying at home (100 students). It is revealed the ratio of students with low, medium, high levels of development of the RP for each university. In general samples of participants of this study, students with a medium level of development of the RP prevail, for a large part of samples has a high level of the motivational component of the RP. At the same time, students with a high level of cognitive and behavioral components of the RP are significantly less. It was studied the dependence of the degree of realization of the RP among Chinese students on its development and manifestation of its specific indicators in the conditions of attestation.

Keywords: *Chinese Bachelor graduates, Chinese and Russian university, research potential, realization of the research potential, comparative analysis.*

BASIC METHODS OF RESEARCH MILITARY PSYCHOLOGY

Y.A. Alexandruk

Military Academy of the Strategic Missile Forces named after Peter the Great

The article gives a definition of the scientific method of research, reveals the groups methods of General psychology, reveals groups methods of military psychology, reveals and analyzes the research methods of military psychology.

Keywords: *scientific method of research, methods of General psychology, methods of military psychology.*

METHODOLOGICAL ASPECTS OF PREPARING COMPETITIVE STUDENTS

D.I. Antropov

Saratov Social and Economic Institute (branch)
Russian Economic University. G.V. Plekhanova

The article contains the main methodological approaches of the pedagogical research of general scientific and specific scientific levels. Methodological approaches to the formation of university students' competitiveness are also substantiated in this article. The goal of the article lies in the theoretical substantiation of necessity considered psychological-pedagogical conditions of formation of competitive specialists. The hypothesis was that training of competitive specialists to be carried out effectively if the notion of competitiveness and identified his signature; the factors of competitiveness of future specialists; the identified psychological and pedagogical conditions that influence the success in the formation of competitive specialists. The result of the study was the withdrawal of private-scientific nature that the competitiveness of graduates depends on the quality of the education received, from the set of personal characteristics that ensure social and professional success of the student. It is revealed that the formation of specialist as a whole person, meeting the requirements and demands of the modern labour market is possible in educational and professional space of higher education. In turn, the design of educational space of the University must be implemented through the development of the model through the implementation of system-active, student-centered and acmeological approaches.

Keywords: *competitiveness, upbringing, competence development, pedagogical conditions, social engineering, self-determination, personality formation, educational system, teaching and educational activities, cognitive activity, educational space, pedagogical technologies.*

SOCIAL INTERACTION SPECIFIC OF EASTERN SELF-DEVELOPMENT SYSTEM PRACTITIONERS IN THE DIFFERENT SOCIO-CULTURAL ENVIRONMENT

M.V. Danilina
